# BIOLOGICAL RECORDING IN CHESHIRE 2003

## *What are you doing this summer?*

Biological Recording in Cheshire 2003 is an introductory short course to the ecology and taxonomy of the habitats and wildlife of Cheshire and to the techniques used to record them.

Delivered as a series of evening sessions and field visits in spring, summer and autumn, the course explores some of the rich diversity that comprises the Cheshire landscape, flora and fauna.

Each session is led by expert tutors and fully equipped and supported by Chester College and RECORD.

Biological recording in Cheshire is suitable for anyone with an interest in the natural world wishing to develop their knowledge and field skills.

### COLLEGE BASED

**April 30** The Cheshire Landscape- the ice age legacy

**May 7** What is biological recording?
