Ephemeroptera of Cheshire.

Species	Notes
<i>Baetis buceratus</i>	
<i>Baetis rhodani</i>	
<i>Baetis scambus</i>	<i>Baetis scambus</i> group.
<i>Baetis vernus</i>	
<i>Caenis luctuosa</i>	<i>Caenis luctuosa</i> group.
<i>Caenis rivulorum</i>	<i>Caenis pseudorivulorum</i> group.
<i>Cloeon dipterum</i>	
<i>Ephemera danica</i>	
<i>Paraleptophlebia submarginata</i>	
<i>Rhithrogena semicolorata</i>	<i>Rhithrogena species</i> group.
<i>Serratella ignita</i>	

NB. Some of the species above were identified using a key that does not permit the safe separation of these species. As a result, these species are now downgraded to a species group as noted.

The following species have not been recorded from Cheshire, however the majority of records contained in the Ephemeroptera Recording Scheme database are from running waters and it is likely that a survey of standing water in Cheshire would produce records of these species.

Cloeon simile
Leptophlebia marginata
Leptophlebia vespertina
Siphonurus lacustris
